## Science Fair

Dear Families,

We are excited to let you know that we will be holding a **Science Fair on Tuesday 30th June 2026** for children in Years 1–6.

During the morning, children will take part in a science demonstration and activity led by staff from **Ormiston Forge Academy**. Children who have completed a science project will also have the opportunity to showcase their work to the Ormiston Forge staff.

Children who would like to take part in the Science Fair are invited to create a science project at home to present on the day. This should include a **display board** to showcase their learning. A simple way to create this is by using a large cardboard box, unfolded and decorated.

The display board should include:

- The project title, question or problem
- Your child's prediction
- A description of their investigation
- Their findings
- A conclusion

Children may choose their own scientific question or investigation. Some possible ideas include:

- Which material is the most waterproof?
- Which surface makes a toy car travel the furthest?
- Which type of paper makes the best paper aeroplane?
- Which material is the best insulator?
- What conditions help a plant grow best?
- Which liquid freezes the quickest?
- Which material absorbs the most water?
- Does the size of a parachute affect how slowly it falls?

Please ensure that any investigation completed at home is **safe and supervised by an adult**.

If your child would like to participate and present a project, please sign up in the MCAS app under 'After School Clubs' by midnight on **Sunday 21<sup>st</sup> June 2026**. This will help us to plan the event effectively.

We are very much looking forward to celebrating the children's curiosity, creativity and scientific thinking.

Yours sincerely,

*H. Malcolm*

**Mr Malcolm**  
Science Lead
