

Temple Meadow

Science Selfie Competition

As a school, we are currently raising the awareness of pupils to appreciate that science is all around us and trying to inspire and motivate as many of our young people to aspire to be scientists of the future. During British Science Week pupils in Years 1-5 will take part in watching Science Farm Live and conduct some follow up activities to explore their learning further. Year 6 will be joining a live chat with some real-life scientists and have the opportunity to ask them questions. Each class will also be looking at one scientist in detail and learning about their journey into their career. Our Early Years pupils are also getting involved and linking their science work to their current topic of Farm to Fork.

As part of British Science Week (officially 10-19th March 2023) we would like to invite all of our pupils to join in with our **Temple Meadow Science Selfie Competition**.

We are encouraging pupils to work with their families to complete some simple science experiments or investigations. This may be something as simple as planting seeds, baking, making slime, looking at the effects of exercise on your body or looking for the signs of spring.

You may also want to conduct one of the recommended science investigations that can be found within the CREST home learning collection that can be found on our website (curriculum/science).

Please do take some photographs of your children investigating the world around them. Please add a caption to explain how your investigation or exploration links to science. Please also include your child's name and class and either send a printed copy into school or email TM admin (tm.admin@meadow.sandwell.sch.uk) with your science selfies.

Pupils will have opportunity to share their science selfies with their class and many will be displayed around the school site.

There will be a prize for the most inspiring science selfie from Early Years, KS1 and KS2.

Please do ensure your entries are in school no later than Friday 24th March 2023 as our winners will be announced in our final assembly on Friday 31st March 2023.

Thanks in advance for your support- Mrs Van Straaten (DHT & Science Co-ordinator).
